

# **Code Quality & Cross - Browser Testing**

Portfolio Website

# Code Quality

## W3C validator check

Code check with 0 errors.

### Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

**Showing results for uploaded file bitu.html**

Checker Input

Show ☐ source ☐ outline ☐ image report [Options...](#)

Check by 

file upload ▾

Choose file

 No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Check

Document checking completed. No errors or warnings to show.

Used the HTML parser.  
Total execution time 25 milliseconds.

### Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

**Showing results for uploaded file index.html**

Checker Input

Show ☐ source ☐ outline ☐ image report [Options...](#)

Check by 

file upload ▾

Choose file

 No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Check

Document checking completed. No errors or warnings to show.

Used the HTML parser.  
Total execution time 21 milliseconds.

### Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

**Showing results for about.html**

Checker Input

Show ☐ source ☐ outline ☐ image report [Options...](#)

Check by 

file upload ▾

Choose file

 No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Check

Document checking completed. No errors or warnings to show.

Used the HTML parser.  
Total execution time 24 milliseconds.

## List of used linters

- linter
- W3C validator
- linter-stylelint
- linter-js-standart

## List of errors

- **2 parse error:** couldn't find the real problem

## Color Checker

No changes had to be made.

My text color is #21243D at 18 px and bold weight

My background color is #94CEFD

My design must be AA compliant

Passes AA

Required contrast ratio: 3

Your contrast ratio: 9.03

# Cross-Browser Testing

## Browser-Specific Issues

### Safari

No issues found. All pages appear and function correctly.

### Edge

No issues found. All pages appear and function correctly.

### Chrome

No issues found. All pages appear and function correctly.

### Firefox

No issues found. All pages appear and function correctly.

## Viewport Issues

### Mobile

No issues found. Some minor aesthetic or spacing tweaks could be made, but overall it looks pretty solid except the hamburger menu. It still needs to be aligned with the rest of the layout.

### Tablet

This view has the most issues of the three viewports. There's no errors or critical issues preventing the user from interacting properly with the website, but it doesn't look that great from a styling standpoint. Therefore, text, titles and the nav need to be aligned adequately.

### Desktop

As I reworked this breakpoint in previous steps only small spacing errors need to be fixed.
